SUMMARY

Bioengineering undergraduate currently gaining hands-on experience in nanobody production and protein engineering through research lab work. Driven by a strong interest in protein design and production for therapeutic applications. Seeking internships to further develop hands-on expertise in protein engineering and contribute to the development of next-generation biologics.

EDUCATION

Izmir Institute of Technology

September 2023 – Present

Bachelor of Science in Bioengineering

- GPA 3.4 / 4.0

EXPERIENCE

Research Intern

August 2026 – September 2026

Izmir Biomedicine and Genome Center (IBG), Kalyoncu Laboratory

- Worked in Dr. Sibel Kalyoncu's antibody engineering laboratory on developing nanobody candidates against immune-checkpoint targets and studying how immune-checkpoint molecules interact.
- Performed ELISA and pH-dependent binding assays, SDS-PAGE and Western blot analysis, Protein A affinity chromatography, and wound healing assays with quantitative image analysis.

Undergraduate Researcher

January 2026 – July 2026

TÜBİTAK 2247-C STAR Program, IZTECH

- Conducted research on antibody engineering under Asst. Prof. Hümeysra Taşkent Sezgin, focusing on nanobodies targeting HIV-1 capsid proteins.
- Hands-on experience in recombinant protein expression, Ni-NTA & ion exchange chromatography, SDS-PAGE & UV characterization and PCR applications.

SKILLS

Laboratory

Recombinant Protein Expression, SDS-PAGE & UV Absorbance, PCR, Chromatography (Ni-NTA, Ion Exchange, Size Exclusion, Protein A), ELISA & pH-Dependent Binding Assays, Western Blotting, Scratch Wound Healing Assay, Mammalian Cell Culture

Software

SnapGene, ImageJ, Fusion 360, ANSYS, Basic Python, Microsoft 365, Adobe Suite

Languages

English (Advanced), Turkish (Native)

LEADERSHIP & ACTIVITIES

Possible With You

January 2026 – Present

Novartis Türkiye & Bilim Virüsü

- Selected as 1 of 100 from 1,000 applicants for an 8-month program focused on career readiness, mentorship, and professional identity building.

Inclusion School

December 2025 – June 2026

AstraZeneca

- Selected as 1 of 50 university students nationwide for a 6-month DEI-focused program on inclusive leadership, gender equality, bias awareness, and social impact design.

President

June 2025 – June 2026

IZTECH Sub-Aqua Society

- Managed operations for a 200+ member society (dive trips, seminars and outreach projects) while designing and facilitating SCUBA courses for new members.

Chairperson

September 2024 – September 2025

IEEE IZTECH Student Branch, Engineering in Medicine and Biology Society (EMBS)

- Elected Chairperson, organized student-led technical trips, trainings and seminars reaching 100+ attendees.

PROJECTS

smartepitope.gkcelebi.me

March 2026

SmartEpitope: Epitope Discovery Platform

- Developed a personal bioinformatics project exploring potential binding sites on viral antigens (SARS-CoV-2, SARS-CoV-1, Influenza A) by combining entropy-based conservation scoring with Meta's ESM-2 protein language model.
- Compared model predictions against IEDB epitope records using IoU metric and integrated Mol* for 3D structural visualization.

htspeptidelab.com

February 2026

Peptide & Protein Engineering Research Group Website

- Developed and currently maintain the official laboratory website using HTML5, CSS3 and JavaScript to showcase research projects, publications and the team.

CERTIFICATIONS

- **Fundamentals of Western Blotting**, Bio-Rad Academy
- **Autodesk 360 Certification**, Autodesk
